Owner

The purpose of my visit was to verify the standards of maintenance and cleanliness were consistent with the Quality Standards requirements and to update our records to reflect any changes to the scores since the last inspection. It was good to catch up with Linda and Richard again and find out what has been happening at Headon Farm. This year sees further investment in the site with the electricity supply now totally underground. The pitches were well maintained with the grass cut and the surrounding grounds, trees, shrubs and flowers all looking good. The toilets and showers were spotless with good detail paid to the cleaning. A very well managed and maintained farm campsite in a great location. I can confirm that the AA Classification remains at 3 Star Gold with a slight increase in the quality score to a very good 94%.
